

SCANAE'S TUTORIALS

**Scanae is awarded
for the development
of its technology:
BioDScreen[®].**

Zoom on  

What is the innovative BioDScreen technology?

BioDScreen® offers an acceleration of eco-formulation strategy and a rapid tool to verify the biodegradability of formulae, for innovative scientific formulation strategy and responsible communication strategy.

Assets

3 times faster

High-throughput screening

Cost-effective assay

BioDScreen® is a high-throughput screening technology of biodegradability assay. Inspired by the biomedical field, this technology integrates a bioreagent to follow live the catabolic activity of bacteria by fluorescence.

Analysis steps
